## 1. Introduction

The aim of this deliverable is to compile basic data on the beneficiaries of the EDI incubation programme.

This dataset contains the details of the beneficiaries of the first EDI incubation programme, that started in September 2018 and will end in May 2019. The beneficiaries are SMEs from a variety of countries.

30 start-ups were selected to participate in EDI first incubation programme. They participated in the Explore phase of the programme (September – October 2018) and presented their proposed solution in a *Datathon* event in Berlin. Out of the 30 start-ups participating in Explore, 16 progressed to the second phase of the programme, the Experiment phase (November 2018 – February 2019), during which they received intense coaching and training. The participants presented their solutions in a final event in Bilbao. Out of the 16 start-ups, six were selected to progress to the last stage of the programme, the Evolve phase, which started in March 2019 and will finish on 7<sup>th</sup> May 2019. The selection of start-ups in each of the phases was done through competition and evaluated by a panel of evaluators (including experts from the EDI consortium as well as external experts).

Depending on the stage achieved and the accomplishment of a set of Key Performance Indicators, beneficiaries received different amounts of funding from EDI. So far, EDI has distributed 1,421,756.67 Euros as financial support to beneficiaries. The six start-ups currently participating in the Evolve phase of this first EDI incubation programme might additionally receive up to 15,000 Euros each, depending on accomplishment of KPIs.

The dataset contains details of the solution proposed by each of the beneficiaries to the EDI challenges. Depending on the stage achieved within the incubation programme (Explore, Experiment or Evolve), beneficiaries have been able to develop in a bigger or smaller depth their solutions. In the case of the 16 beneficiaries that participated in the Experiment phase, the dataset includes a link to a video showing the devised solution.

The solutions proposed tackle a variety of sectors, corresponding to the EDI challenge addressed: Energy and Environment (9), Industry 4.0 (5), Smart Cities (5), Retail (5), Internet and Media (4). In addition, 2 beneficiaries presented solutions that addressed multiple sectors, i.e. took part in the cross-sector participation mode.

This is a public deliverable. It will be made public once the incubation process to which it refers (iteration 1) finishes in May 2019, with the aim of publishing final and updated data. This dataset does not contain personal data.

## 2. Access to the dataset

The Beneficiaries dataset, iteration 1, is presented in an Excel spreadsheet which can be accessed through the following link:

[https://drive.google.com/open?id=1JBr\\_RbIH\\_qVXBSTO1JaM1mE5ASW6vUMU](https://drive.google.com/open?id=1JBr_RbIH_qVXBSTO1JaM1mE5ASW6vUMU)

The information is also available in FIWARE Lab in the following link:

<https://data.lab.fiware.org/dataset/edi-sub-grantees>

### **3. Contents of the dataset**

The Beneficiaries Dataset contains the following fields:

- Beneficiary name
- Beneficiary legal name
- Country
- Website
- Iteration details, i.e. reference to EDI and incubation round within EDI
- Incubation stage reached
- Funding received from EDI
- Sector tackled
- Challenge addressed
- Brief description of the solution
- URL of solution presentation (if applicable): this field is applicable only for beneficiaries reaching the Experiment stage of the incubation.

The following fields will be updated after the incubation process ends on 7<sup>th</sup> May 2019: (i) Funding received from EDI, (ii) Brief description of the solution, and (iii) URL of the solution presentation.
